The electricity has received the Ekoenergy label, a global, non-profit eco-label for renewable energies.

*The tariffs for the use of the network are accepted by a decision of the Institut Luxembourgeois de Régulation (ILR) and approved by ministerial decree. Network charges are invoiced by Energy Revolt s.c. and reimbursed to the entitled parties. A variation, even retroactive, in the network usage tariffs may be passed on by Energy Revolt s.c. to the end users.

**The compensation fund is a contribution to encourage the production of national electricity based on renewable energy sources or cogeneration. It is managed by the Institut Luxembourgeois de Régulation (ILR), which determines the amount of this contribution each year.

***Electricity tax is charged by all suppliers on behalf of the State, the amount being set annually by the budget law.
